PROJECTS

Personal Portfolio Project | React JS

- Built a web application using REACT JS to showcase my skills and projects.
- Used various JS libraries for design and animation.
- [Github link<->](#)

Chrome Extension Project | JavaScript, API

- Developed a Chrome Extension aimed at providing users with a daily dose of humor through a collection of curated jokes.
- Implemented a user-friendly interface for joke delivery, leveraging HTML, CSS, and JavaScript to create a seamless browsing experience.
- [Github link<->](#)

Weather App | JavaScript, API

- Developed a dynamic Weather App using HTML, CSS, JavaScript, and a third-party API to provide real-time weather forecasts and information for any location worldwide.
- Utilized HTML and CSS to design an intuitive and responsive user interface, while JavaScript was employed to interact with the API, fetch weather data, and dynamically update the user's location-based weather information.
